Department:
Government Printing Works
REPUBLIC OF SOUTH AFRICA

HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works* (*GPW*).

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*'. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as **@gpw.gov.za**

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at **www.gpwonline.co.za**
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

Note 3

3.1 The provisions of Article 4(b) of Annex 2 on Rules of Origin concerning Products having acquired originating status which are used in the manufacture of other Products apply regardless of whether this status has been acquired inside the factory where these Products are used or in a factory in another State Party.

Example 1: An engine of Heading 84.07, for which the rule may state that the value of non-originating Materials which may be incorporated may not exceed a certain percentage of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of Heading ex 72.24.

If this forging has been undertaken in a State Party from a non-originating ingot, it has already acquired originating status by virtue of the rule applicable to Products of HS Chapter 72 in this Appendix. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in another State Party. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating Materials used.

3.2 The rule in Column 3 represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status. Conversely, the carrying out of less working or processing cannot confer originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

3.3 When a rule in Column 3 specifies that a Product may be manufactured from more than one material, this means that any one or more Materials may be used. It does not require that all the Materials listed must be used.

Example 2: The rule for fabrics of Headings 52.08 to 52.12 provides that natural fibres may be used and that chemical Materials, among other Materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

3.4 Where a rule in Column 3 specifies that a Product must be manufactured from a particular Material, the condition obviously does not prevent the use of other Materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example 3: In the case of an article of apparel of ex Chapter 62 made from non-woven Materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting Material would normally be at the stage before yam, that is, the fibre stage.

"SPECIFIC PROCESSES"

Note 4

4.1 For the purposes of Headings 27.07 and 27.13 the following are the "specific processes":

a) vacuum distillation;

b) redistillation by a very thorough fractionation process;

c) cracking;

d) reforming;

e) extraction by means of selective solvents.

f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;

g) polymerisation;

h) alkylation; and

i) isomerisation.

4.2 For the purposes of Headings 27.10, 27.11 and 27.12, the following are the 'specific processes':

a) vacuum distillation;

b) redistillation by a very thorough fractionation process

c) cracking;

d) reforming;

e) extraction by means of selective solvents;

f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;

g) polymerisation;

h) alkylation;

i) isomerisation;

j) in respect of heavy oils falling within Heading ex 27.10 only, desulphurisation with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the Products processed (ASTM D 1266-59 T method);

k) in respect of Products falling within Heading 27.10 only, deparaffining by a process other than filtering;

l) in respect of heavy oils falling within Heading ex 27.10 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of Heading ex 27.10 (e.g. hydrofinishing or decolorisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;

m) in respect of fuel oils falling within Heading ex 27.10 only, atmospheric distillation, on condition that less than 30 per cent of these Products distils, by volume, including losses, at 300 °C by the ASTM D 86 method; and

n) in respect of heavy oils other than gas oils and fuel oils falling within Heading ex 27.10 only, treatment by means of a high-frequency electrical brush-discharge.

4.3 For the purposes of Heading 27.07and 27.13 simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing Products with different sulphur contents, any combination of these operations or like operations do not confer origin.

TEXTILES

Note 5

5.1 The term "natural fibres" is used in this Appendix to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.

5.2 The term "natural fibres" includes horsehair of Heading 05.03, silk of Headings 50.02 and 50.03 as well as the wool fibres, fine or coarse animal hair of Headings 51.01 to 51.05, the cotton fibres of Headings 52.01 to 52.03 and the other vegetable fibres of Headings 53.01 to 53.05.

5.3 The terms "textile pulp", "chemical Materials" and "paper-making Materials" are used in this Appendix to describe the Materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

5.4 The term "man-made staple fibres" is used in this Appendix to refer to synthetic or artificial filament tow, staple fibres or waste, of Headings 55.01 to 55.07.

Note 6

6.1 The rules set out in Column 3 shall not be applied to any basic textile Materials, used in the manufacture of this Product, which, taken together, represent [X] per cent or less of the total weight of all the basic textile Materials used. (See also Notes 6.3 and 6.4 below).

This gazette is also available free online at www.gpwonline.co.za

6.2: However, the tolerance mentioned in Note 6.1 may only be applied to mixed Products which have been made from two or more basic textile Materials.

The following are the basic textile Materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making Materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments, artificial man-made filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
- Products of Heading 56.05 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other Products of Heading 56.05.

Example 4: A yarn of Heading 52.05 made from cotton fibres of Heading 52.03 and synthetic staple fibres of Heading 55.06 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which may require manufacture from chemical Materials or textile pulp) may be used up to a weight of [X] per cent of the yarn.

Example 5: A woollen fabric of Heading 51.12 made from woollen yarn of Heading 51.07 and synthetic yarn of staple fibres of Heading 55.09 is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin rules (which may require manufacture from chemical Materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or other otherwise prepared

for spinning) or a combination of the two may be used provided their total weight does not exceed [X] per cent of the weight of the fabric.

Example 6: Tufted textile fabric of Heading 58.02 made from cotton yarn of Heading 52.05 and cotton fabric of Heading 52.10 is only a mixed Product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarn used are themselves mixtures.

Example 7: Where the tufted fabric concerned has been made from cotton yarn of Heading 52.05 and synthetic fabric of Heading 54.07, then, obviously, the yarns used are two separate basic textile Materials and the tufted textile fabric is accordingly a mixed Product.

6.3 In case of Products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is [X] per cent in respect of this yarn.

6.4: In the case of Products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is [X] per cent in respect of this strip.

Note 7

7.1 Textile Materials, with the exception of linings and interlinings, which do not satisfy the rule set out in Column 3 for the made-up Product concerned may be used provided that they are classified in a Heading other than that of the Product and that their value does not exceed [X] per cent of the ex-works price of the Product.

7.2 Without prejudice to Note 6.3, Materials which are not classified within Chapters 50 to 63 may be used freely in the manufacture of textile Products, whether or not they contain textiles.

Example 8: Where a rule in the Appendix provides that for particular textile items yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

7.3 Where a percentage rule applies, the value of Materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating Materials incorporated.

CHEMICAL PROCESSING RULES TO CONFER ORIGINATING STATUS

Note 8

Notes to Section VI of the Harmonized System

Products of the Chemical or Allied Industries (Chapters 28 to 38)

8.1 Rules 1 through 7 of this Section confer origin to goods of any Chapter, Heading or Sub-heading in this Section, except as otherwise specified in those rules.

8.2 Notwithstanding Note 8.1, goods shall be originating if they meet the applicable change in tariff classification or the percentage value content of non-originating material specified in Column 3 of the Appendix.

Rule 1: Chemical Reaction Origin

8.3 Goods of Chapters 28 through 38, which are subject to a chemical reaction, shall be treated as originating if the chemical reaction occurred in the territory of one or more of the State Parties.

8.4 For purposes of this section, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

8.5 The following are not considered to be chemical reactions for the purposes of determining whether a Product is an originating good:

(a) dissolution in water or in other solvents;

(b) the elimination of solvents including solvent water; or

(c) the addition or elimination of water of crystallization.

Rule 2: Purification Origin

8.6 Goods of Chapters 28 through 38 that are subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the State Parties:

This gazette is also available free online at www.gpwonline.co.za

This gazette is also available free online at www.gpwonline.co.za

(a) Purification of goods resulting in the elimination of [X] percent of the content of existing impurities; or

(b) The reduction or elimination of impurities resulting in goods suitable for one or more of the following applications:

(i) Pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;
(ii) Chemical Products and reagents for analytical, diagnostic or laboratory uses;
(iii) Elements and components for use in micro-elements;
(iv) Specialised optical uses;
(v) Non toxic uses for health and safety;
(vi) Biotechnical use;
(vii) Carriers used in a separation process; or
(viii) Nuclear grade uses.

Rule 3: Mixtures and Blends

8.7 Goods of Chapters 30, 31, 33 through 38, except for Heading 38.08, shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of Materials to conform to predetermined specifications which results in the production of goods having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input Materials, occurs in the territory of one or more of the State Parties.

Rule 4: Change in Particle Size

8.8 Goods of Chapters 30, 31 and 33, shall be treated as originating if the following occurs in the territory of one or more of the State Parties:

the deliberate and controlled modification in particle size of goods, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in goods having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input Materials is considered to be origin conferring.

Rule 5: Standards Materials

8.9 Goods of Chapters 28 through 38, shall be treated as originating if the production of these Materials occurs in the territory of one or more of the State Parties.

8.10 For the purposes of this Note “standards Materials” (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses and having precise degrees of purity or proportions, which are certified by the manufacturer.

Rule 6: Isomer Separation

8.11 Goods of Chapters 28 through 38, shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the State Parties.

Rule 7: Separation Prohibition

8.12 Goods that undergo a change from one classification to another in the territory of one or more of the State Parties as a result of the separation of one or more Materials from a man-made mixture shall not be treated as originating unless the isolated material underwent a chemical reaction in the territory of one or more of the State Parties.
