HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works* (*GPW*).

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*'. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as **@gpw.gov.za**

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at **www.gpwonline.co.za**
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

ELECTRONIC COMMUNICATIONS ACT, 2005
(ACT NO. 36 OF 2005)

PROPOSED POLICY DIRECTION TO THE INDEPENDENT COMMUNICATIONS AUTHORITY OF SOUTH AFRICA ON BROAD-BASED BLACK ECONOMIC EMPOWERMENT

1.1 The Minister of Communications and Digital Technologies intends to issue the proposed Policy Direction in the Schedule to the Independent Communications Authority of South Africa in terms of section 3 of the Electronic Communications Act, 2005 (Act No. 36 of 2005).

1.2 The objectives of this policy direction are to give effect to existing national and sector policy pertaining to the rollout of broadband and the bridging of the digital divide. In addition, the Minister wishes to give effect to the objectives of the Act, including the objectives to: (i) encourage investment, including strategic infrastructure investment, and innovation in the communications sector; (ii) promote competition within the ICT sector and (iii) promote, facilitate and harmonise the achievement of the objects of legislation related to the Act.

1.3 To accomplish these objectives, it is necessary for regulatory certainty and consistency to apply to members of the ICT Sector, including the holders of licences under the Act. Consequently, there is a need to harmonise the requirements and provisions of the Act with other legislation that applies to the recognition of ownership of members of the ICT Sector, including the Amended Broad-Based Black Economic Empowerment (B-BBEE) ICT Sector Code.

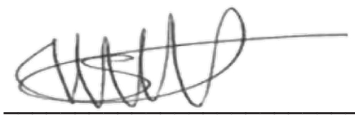

1.4 The achievement of these objectives will require ICASA to implement certain amendments to regulations promulgated by it in order to meet the imperatives of other national laws.

1.5 Interested persons are invited to provide written comments on the proposed Policy direction, within 30 working days of the date of publication, addressed to –

The Director-General, Department of Communications and Digital Technologies For attention: Mr. A Mmoto, Chief Director
First Floor, Block A3, iParioli Office Park, 1166 Park Street, Hatfield, Pretoria

2. An interested person making a written submission is deemed to have consented to its disclosure to a requester, except if otherwise requested by such interested person based on one of the grounds for refusal of access to records as provided in the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000).

SCHEDULE

PROPOSED POLICY DIRECTION TO THE INDEPENDENT COMMUNICATIONS AUTHORITY OF SOUTH AFRICA ON BROAD-BASED BLACK ECONOMIC EMPOWERMENT

1. Background

1.1 The purpose of this policy direction is to clarify the Department of Communications and Digital Technologies' position on broad-based black economic empowerment including the recognition of equity equivalent investment programmes.

1.2 This is part of an initiative to significantly expand access to broadband connectivity to poor South Africans and people living in remote parts of the country.

1.3 World Bank research shows that, on average, every 10% increase in broadband penetration results in 1.21% GDP growth in middle income countries such as South Africa. Broadband access makes it easier for people to start businesses, grow businesses, seek employment, work remotely, and market goods and services. Giving millions of South Africans access to broadband would therefore constitute one of the biggest empowerment programmes the South African government has ever undertaken.

1.4 The focus of this policy direction is on lowering regulatory hurdles to investment in reliable broadband and ensuring access to the internet. This is in line with the Broad-Based Black Economic Empowerment Codes of Good Practice which recognise that the global nature of multinational corporations' operations may constrain their ability to comply with equity ownership requirements. Equity equivalent investment programmes, recognised in the Amended Broad-Based Black Economic Empowerment (B-BBEE) ICT Sector Code published in Government Notice No. 1387, Government *Gazette* No. 40407 of 07 November 2016 (ICT Sector Code) and other sector codes, provide an avenue for factoring in alternative ways for multinational companies to make an impact on South Africa's socio-economic development.

1.5 Policy clarity on the recognition of equity equivalent investment programmes has long been sought by multinational operators in the ICT industry. This will provide the certainty necessary to attract increased investment in ICT and accelerate universal internet access.

2. Broad-Based Black Economic Empowerment Framework

2.1 Section 9(2)(b) of the Electronic Communications Act, 2005 (Act No. 36 of 2005) (ECA) provides that individual licences must include the percentage of equity ownership to be held by persons from historically disadvantaged groups, which must not be less than 30%, or such other conditions or higher percentage as may be prescribed under section 4(3)(k) of the Independent Communications Authority of South Africa Act, 2000 (Act No. 13 of 2000)(ICASA Act).

2.2 Section 4(3)(k) of the ICASA Act provides that the Authority may make regulations on empowerment requirements to promote broad-based black economic empowerment. Broad-based black economic empowerment has the meaning assigned to it in the Broad-Based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003) (B-BBEE Act).

2.3 The Authority has opted to prescribe regulations on empowerment requirements to promote broad-based black economic empowerment under section 4(3)(k) of the ICASA Act and published the Regulations in respect of the Limitations of Control and Equity Ownership by Historically Disadvantaged Groups (HDG) and the Application of the ICT Sector Code in General Notice No. 170, Government Gazette No. 44382 of 31 March 2021, as amended.

2.4 The use of the word 'or' in section 9(2)(b) of the ECA is peremptory, and therefore the requirement for equity ownership by historically disadvantaged groups is replaced by the option of adopting regulations prescribed under section 4(3)(k) of the ICASA Act.

2.5 In addition, the B-BBEE Act provides in section 10 that every organ of state and public entity must apply any relevant code of good practice issued in terms of the B-BBEE Act in determining qualification

criteria for the issuing of licences, concessions or other authorisations in respect of economic activity in terms of any law. It further provides that an enterprise in a sector in respect of which a sector Code of Good Practice has been issued, may only be measured for compliance with the requirements of broad-based black economic empowerment in accordance with that code.

2.6 It follows that enterprises in the ICT sector may only be measured for compliance with the requirements of broad-based black economic empowerment in accordance with the Amended Broad-Based Black Economic Empowerment (B-BBEE) ICT Sector Code.

2.7 The Regulations in respect of the Limitations of Control and Equity Ownership by Historically Disadvantaged Groups (HDG) and the Application of the ICT Sector Code contradict the legal framework for broad-based black economic empowerment by prescribing equity ownership requirements by historically disadvantaged groups and black people and do not recognise compliance with the ICT Sector Code in respects other than ownership.

2.8 The broad-based black economic empowerment status level of an entity is the accepted method to measure overall performance against the ICT Sector Code and promotes broad-based black economic empowerment, including through equity equivalent investment programmes.

3. Policy Direction

3.1 The Authority is hereby directed, in terms of section 3(2) of the Electronic Communications Act, 2005 (Act No. 36 of 2005) to urgently consider alignment of the Regulations in respect of the Limitations of Control and Equity Ownership by Historically Disadvantaged Groups (HDG) and the Application of the ICT Sector Code, with the Amended Broad-Based Black Economic Empowerment (B-BBEE) ICT Sector Code.

INTRODUCTION

The Purpose of the Inquiry

The purpose of the Inquiry was to solicit views and inputs from interested stakeholders on the impact of loadshedding and the regulatory relief measures the Authority should consider alleviating the impact thereof in the electronic communications, broadcasting, and postal sectors during the various stages of loadshedding.

The Inquiry was in the form of a questionnaire wherein interested stakeholders were required to answer a series of questions within forty-five (45) days from the date of publication of the notice in the Government Gazette.

This Findings document consists of three sections:

- Section A: Outline of the process followed by the Authority.
- Section B: Submissions received from interested parties and the Authority Findings.
- Section C: Conclusion

SECTION A: OUTLINE OF THE PROCESS FOLLOWED BY THE AUTHORITY

2.1. On 01 December 2023, the Authority issued a notice of Inquiry which was published in Government Gazette No. 49795 under Notice 4139 of 2023. The notice was issued in terms of section 4B of the ICASA Act. The purpose of the Inquiry was to solicit views and inputs from interested stakeholders on the impact of loadshedding and the regulatory relief measures the Authority could consider alleviating the impact thereof in the electronic communications, broadcasting, and postal sectors during the various stages of loadshedding.

2.2. The Inquiry was in the form of a questionnaire wherein interested stakeholders were required to answer a series of questions within forty-five (45) days from the date of publication of the notice in the Government Gazette.

2.3. The Authority received twenty-eight (28) written submissions in response to the Inquiry notice.

This gazette is also available free online at www.gpwonline.co.za

SECTION B: SUBMISSIONS RECEIVED FROM INTERESTED PARTIES AND THE AUTHORITY FINDINGS

3.1. (Question 1) Describe the impact loadshedding is having on your business and provide substantive reasoning around the following areas: economic, infrastructure, social and consumer impact from 5 April 2023 to the date this notice was published.

3.2.1. The Authority findings:

The Authority found that stakeholders did experience similar negative impacts due to the effects of loadshedding in that loadshedding significantly impacted the ICT sector through disruptions to their operations, increasing costs and damaging their customer's trust.

Loadshedding caused ICT sector businesses to experience frequent disruptions in their operations. Without a stable power supply, businesses such as telephone companies, internet service providers, radio stations and other broadcasters were unable to function optimally. This leads to:

- Downtimes: Frequent power outages did result in extended periods of downtime, leading to a significant loss of productivity and revenue.
- Network Congestion: When the power is restored, network congestion occurs as all devices and systems simultaneously come back online, causing further delays and disruptions.
- Revenue Loss: Communication sector businesses indicated that a lot of revenue was lost due to downtime, reduced productivity, and the inability to provide services to customers.
- Increased Expenses: Businesses stated that they did incur additional costs to mitigate the effects of loadshedding, such as investing in backup power systems, generators, and fuel.

Loadshedding further affects the customer experience, leading to:

- Frustration: Frequent disruptions to communication services cause frustration among customers, leading to a loss of trust and loyalty.

This gazette is also available free online at **www.gpwonline.co.za**

- Decreased Satisfaction: The unavailability of services during loadshedding periods negatively impacts customer satisfaction, affecting businesses' bottom lines.

The Authority notes that the stakeholders share similar negative impacts because of loadshedding. The cumulative effect of loadshedding had long-term consequences for communication sector businesses.

3.2. (Question 2) Quantify the severity of the impact of loadshedding in terms of the loadshedding stages

3.2.1. The Authority findings:

The Authority found that loadshedding effects were experienced differently by stakeholders depending on the various stage(s) of loadshedding. Whilst the majority of stakeholders indicated that all stages of loadshedding affected their business operations, it was interesting to note the response from one stakeholder (i.e. Simigenix) which indicated that it did not generally feel the impact of loadshedding on its operations across different stages as it had sufficient battery back-ups in place which enabled it to operate through the highest loadshedding stages.

In terms of the actual impact per stage of loadshedding, the Authority found that when loadshedding was at stage 1, there was a low impact on the business operations of stakeholders, i.e., stakeholders were able to operate with minimal disruptions.

Between stages 2 and 4, the impact for most stakeholders appeared to be medium to moderate. The stakeholders further indicated that when loadshedding is between stage 2 and 4, the negative effects experienced included, among others:

- An increase in the reliance on backup power systems, which, in turn, resulted in the associated costs of running such systems increasing and thereby putting financial strain on stakeholders' businesses.
- customers and consumers experienced service interruptions /connectivity issues due to batteries not being able to sufficiently recharge.

This gazette is also available free online at www.gpwonline.co.za

Beyond stage 4 and upwards, the challenges experienced by stakeholders significantly increased. These challenges include, among others:

- system failures (including generator failures due to excessive running hours),
- severely compromised network availability (which in turn affected quality of service),
- cancellation and/or downgrading of services (such as television subscription) by customers,
- damage to infrastructure, potential job losses and business closures.

The Authority found that loadshedding was unpredictable, and it was often implemented at short notice. Therefore, regardless of the stage(s) of loadshedding being implemented (even during the periods of its suspension, as is currently the case), it was essential for stakeholders to continue taking proactive measures and have monitoring systems in place (to the extent that they can) to mitigate the negative impact of loadshedding on their business continuity. Whilst we are currently in an extended period of suspended loadshedding, there is still load reduction implemented and warnings of loadshedding returning.

3.3. (Question 3) What measures, if any, have you put in place to mitigate the negative impact of loadshedding?

3.3.1. The Authority findings:

The Authority found that licensees have taken a proactive approach aimed at mitigating the impact of loadshedding on customers/end-users. Stakeholders' mitigation strategies underscored the significant impact of loadshedding on their operations, which affected their consumers/end users, revenue streams and operational costs.

The Authority's analysis revealed a multifaceted approach by stakeholders to mitigate the negative impact of loadshedding. The Authority found that licensees were investing and implementing broadly grouped strategies to mitigate the

negative impact of loadshedding, namely: alternative energy investments, backup power solutions, customer engagement, and network optimisation.

Companies such as Vodacom, Kagiso Media and Vumatel considered solar power investments to be a critical business strategy. Reliance on the grid and diesel generators had decreased due to renewable energy sources offered by solar panels. Companies like Telkom and Vodacom have put energy-saving measures into place. These include optimising energy utilisation in base stations and data centres and utilising more energy-efficient network equipment. That helped with loadshedding and advancing long-term sustainability objectives.

Companies such as MTN and Telkom have indicated that they have installed high-efficiency rectifiers and expanded base station battery capacities to guarantee network resilience. During disruptions, the Licensees stated that those steps do aid in keeping the network operational.

To make sure that broadcasting programming is still available during blackouts, companies such as MultiChoice and eMedia have introduced pop-up channels and re-airing techniques. The goal of the strategy is to keep consumers/end users and advertisers interested. Premedia's endeavours to educate viewers and advertisers on utilising different platforms highlight the significance of educating customers to lessen the effects of decreased coverage during loadshedding. The tactic aids in preserving viewer interest on many media channels.

The Authority commends the licensees on the investment made in alternative power. However, the Authority remains concerned with the impact this unplanned investment will have on the end-user's cost to communicate and the commercial sustainability of licensees. The Authority is mindful that these trade-offs will hurt the cost of communicating and bridging the digital divide. The Authority is of the position that there is a need to mitigate the impact on end-users where possible.

The Authority further found that the mitigation strategies implemented by licensees to counter the effects of loadshedding were not sufficient to address the effects of loadshedding but only assisted in mitigating the impact of loadshedding.

3.4. (Question 3.1) Have the measures put in place been effective and sustainable

3.4.1. The Authority findings:

The Authority found that the implementation of loadshedding has resulted in unreliability and poor service quality in the provision of broadcasting and electronic communication services. On the other hand, service providers that were employed to assist were unable to deploy backup power (generators and batteries) in certain unsafe areas (due to crime), where services were disrupted by loadshedding. In certain circumstances, prolonged and frequent loadshedding caused equipment malfunction and regular maintenance. Subsequently, customer service was impacted, causing customer disappointment and dissatisfaction.

The Authority found that there was a significant impact on customer service during loadshedding even when there were contingency plans made by service providers in the delivery of broadcasting and electronic communication services. The Authority further recognised reported increased capacity constraints, service interruptions, customer frustration, increased maintenance costs and reputational damage as part of the contributing factors of the impact of loadshedding.

3.5. (Question 4) How has loadshedding affected Customer Service?

3.5.1. The Authority findings:

The Authority found that the implementation of loadshedding has resulted in unreliability and poor service quality in the provision of broadcasting and electronic communication services. On the other hand, service providers that were employed to assist were unable to deploy backup power (generators and batteries) in certain unsafe areas (due to crime), where services were disrupted by loadshedding. In certain circumstances, prolonged and frequent loadshedding caused equipment malfunction and regular maintenance. Subsequently, customer service was impacted, causing customer disappointment and dissatisfaction.

The Authority also found that there was a significant impact on customer service during loadshedding, even when there were contingency plans made by service providers in the delivery of broadcasting and electronic communication services.

3.6. (Question 5) What are the impediments that are a result of the existing regulatory framework on your business, particularly related to loadshedding?

3.6.1. The Authority findings:

The Authority found that the impediments to compliance, according to various licensees, were on the following regulations:

- End-User and Subscriber Service Charter Regulations 2016 as amended.
- Code of Conduct Regulations of 2007.
- Code for Persons with Disabilities Regulations of 2021.
- Standard Licence Terms and Conditions of 2010.

Furthermore, the stakeholders highlighted the following challenges:

- Lack of exemptions for the ICT Infrastructure.
- Financial constraints due to Regulatory fees, levies, and licensing costs imposed by ICASA on business.
- Lack of network capacity: Loadshedding is making parts of the networks unavailable, there is a requirement to accommodate more customers on the remaining sites that have some protection against loadshedding.
- The timeliness of executing the USAO obligations and Social Obligations.

3.7. (Question 6) What regulatory interventions within the Authority's mandate should the Authority consider to provide relief to the electronic communications, broadcasting and postal sector concerning each stage of loadshedding? The interventions should be limited to what is within the Authority's mandate.

3.7.1. The Authority findings:

The licensees are of the view that the Authority must consider:

- suspending some of the compliance requirements. This includes regulations such as End-User and Subscriber Service Charter Regulations 2016 as amended ("EUSSC Regulations"), Code of conduct, Code for persons

This gazette is also available free online at www.gpwonline.co.za

with disabilities (NRS) and Standard licence T&C. This can be achieved through relaxing the regulatory obligations.

- redirect funds towards implementing more resilience networks during loadshedding. This can be in the form of discounted spectrum fees, USO contribution and delaying the social obligations during the loadshedding period.
- issuing unused temporary spectrum to licensees that can prove that they are experiencing congestion on their network during loadshedding.
- lifting the channel per channel delivery and allowing for an overall network delivery against the self-regulated quotas for television/audio-visual services for the broadcasters.
- extending official time for prime time for the broadcasters.
- engaging with ESKOM on critical infrastructure to be exempt from loadshedding.

3.7.2. The Authority Position:

The Authority's position on the affected regulations is summarised below as follows:

3.7.2.1. Regulations in Respect of the Code of Conduct for ECS and ECNS Licensees[1]:

The Code of Conduct regulations allow licensees to develop voluntary key commitments to provide services within their respective parameters or means possible as a good practice. The Authority is of the view that there is no link between loadshedding and the Code of Conduct provisions.

3.7.2.2. Standards Terms and Conditions:

The Authority is of the view that the Standard Terms and Conditions regulations provide general standard terms and conditions to all licensees to ensure regulatory certainty to demonstrate compliance with the principles of the primary legislation.

[1] Published in Government Notice No. 1740 (Government Gazette No. 30553) of 7 December 2007

This gazette is also available free online at **www.gpwonline.co.za**

It should be noted that the current Standard Terms and Conditions it is sufficient to allow licensees to apply for exemptions from compliance with the regulations when they experience any form of crisis. It must be noted that during COVID-19, the Authority increased the limit for broadcasting programme syndication and programme sharing from 20% to 45% to manage restrictions.

The Authority believes that during crisis periods, the Regulations should be responsive to the needs of the sector and allow for this increase to manage any form of national crisis.

3.7.2.3. Type Approval Process:

Association of Comms and Technology (ACT) and South African Communications Forum (SACF) advised the Authority to consider automatic type approval of equipment with prior approvals in other recognised jurisdictions. This approach would expedite market access for equipment that will aid in alleviating the effects of loadshedding or provide connectivity during loadshedding.

The Authority notes the suggestion, however the Authority is of the view that its current Type Approval process is sufficiently responsive to the urgent needs of the industry. Additionally, the newly developed Equipment Authorisation Regulations, published in Government Gazette 46146 on 31 March 2022 ("Equipment Authorisation Regulations"), make allowance for Type Approval Exemptions and for Applicants to provide a statement of conformity from a certification body for class 2 devices. Once these Equipment Authorisation Regulations are in force, they will provide a soft-touch regulatory approach that will ease the regulatory burden, thereby enabling quick market access.

3.7.2.4. End-user and Subscriber Service Charter /QoS Parameters Standard:

The Authority has noted the submissions by Licensees on the EUSSC Regulations. The EUSSC Regulations cover, in the main, a situation like loadshedding and its consequent impact on Licensees vis-à-vis the services they provide to the end user.

Regulation 16(1) of the regulations deals with impossibility of performance and states that in the event a licensee fails to provide end-users with the service due

This gazette is also available free online at www.gpwonline.co.za

to circumstances beyond its control for a period of more than two (2) hours, a licensee must

a) "As soon as it becomes aware of the outage:
   i. to notify the Authority in writing;
   ii. issue the public notice to the affected end-users;
b) Indicate timeframes within which end-users should expect the service to be restored; and
c) *Submit a report to the Authority detailing the events that lead to the impossibility of performance including:*
   i. *the cause of outage;*
   ii. *steps taken to minimise a repeat of the outage if applicable; and*
   iii. *steps taken to inform the end-users of the outage"…….*

Therefore, licensees should have regard to and invoke Regulation 16, titled "Impossibility of Performance" in the EUSSC Regulations 2016 as amended, in response to any loadshedding event they may experience.

The Authority is further encouraging Licensees to utilise the provisions of regulation 6(2) and 6(3) of the Standard Terms and Conditions amendment regulations as published in Government gazette No. 48317 of 28 March 2023[2].

3.8. (Question 6.1) How should these interventions vary depending on each stage of loadshedding?

3.8.1. The Authority findings:

The Authority found that these interventions ought to remain unaffected by the various stages of loadshedding as they serve the consumers' interests. Therefore, regardless of the stage(s) of loadshedding being implemented (even during the periods of its suspension, as is currently the case), it was essential for stakeholders to continue taking proactive measures and have monitoring systems in place (to the extent that they can) to mitigate the negative impact of loadshedding on their business continuity.

3.9. (Question 7) Are there agreements in place in terms of the Energy Users Block Exemption, 2023? If so, have they yielded positive results?

3.9.1. The Authority findings:

The Authority found that there are currently no agreements in place in terms of energy user block exemptions. However, the Authority noted that the ACT was facilitating energy user block exemption for its members.

3.9.2. The Authority Position:

The Authority noted that licensees who took part in the inquiry did not apply for Energy Users Block Exemption. The Authority has no mandate to facilitate energy user block exemption as the mandate rests with the Competition Commission.

3.10. (Question 8) Have you concluded any wheeling agreements with Independent Power Producers (IPPs and ESKOM)? If not, are there any plans to conclude such agreements in future?

3.10.1. The Authority findings:

The Authority found that the majority of entities that took part in the inquiry have not concluded any wheeling agreements to date, and to a large extent, there is no indication that the wheeling agreements will be concluded soon except for Telkom, who submitted that it was still investigating wheeling solutions.

The Authority further found that Vodacom has concluded a virtual wheeling agreement with Eskom, and this submission is supported by ACT. In terms of the arrangement, Vodacom indicated it will secure electricity from independent power producers (IPPs).

3.11. (Question 9) Are there any efforts in place to combat theft, vandalism, and destruction of infrastructure during loadshedding?

3.11.1. The Authority findings:

This gazette is also available free online at www.gpwonline.co.za

The Authority found that licensees are collaborating closely with the Communication Risk Information Centre (COMRiC) through ACT to address the challenges of infrastructure sabotage and vandalism. COMRIC's efforts focus on sharing intelligence across sectors to combat crimes impacting Operators.
The Authority also found that other licensees have sought to protect batteries for their towers and related signal distribution apparatus with cement or concrete enclosures, especially in high-risk areas.

Licensees have also indicated that they have installed Closed-Circuit Television (CCTV) for remote monitoring and appointed armed response security to assist in securing their infrastructure.

The Authority further found that licensees have recruited local community members to serve as on-the-ground monitoring personnel for their infrastructure.

The Authority supports the initiatives made by the licensees and further encourages the involvement of Law enforcement agencies where the crime of sabotage and vandalism occurs. The Authority encourage licensees to continue collaborating with relevant stakeholders to ensure the safeguarding of their infrastructure from criminal syndicates.

3.12. (Question 10) What measures, if any, have you put in place within your space to mitigate the impact of loadshedding on the business and your customers?

3.12.1.1. The Authority findings:

The Authority found that licensees have invested in backup power systems to guard against loadshedding stages to ensure business continuity during power outages.

Licensees submitted that they have devised loadshedding mitigating strategies to ensure that their business continues to run and that consumers remain connected during power outages. There has been a considerable investment made by

This gazette is also available free online at **www.gpwonline.co.za**

licensees towards procurement of backup systems in the form of diesel generators, backup batteries and solar panels.

The Authority also found that the mitigation strategies implemented by licensees to counter the effects of loadshedding were not necessarily sufficient to address the effects of loadshedding but only assisted in mitigating the impact of loadshedding.

SECTION C: CONCLUSION

The Authority has noted that Eskom's generation capacity of electricity in South Africa has not yet stabilised.

The Authority has further noted Eskom approved generation recovery plan which is being implemented to address the challenges of loadshedding in the country.

The Authority will consider providing regulatory forbearance to the licensees on a case-by-case basis in terms of the existing regulations and investigate amendment of some Regulations which impede licensees from full compliance with their regulatory obligations to the Authority and end-users during loadshedding.

Currently, some of the regulations, such as Standard Terms and Conditions for ECS/ECNS and Broadcasting Services, have provisions that allow licensees to submit to the Authority the applications for exemption/s from compliance with certain elements of compliance requirements when they encounter force *majeure* elements which hinders them from meeting their compliance requirements.

The Authority further recommends that licensees continue to invest in renewable energy as a form of ensuring that their services continue to run effectively and efficiently when they experience loadshedding in future.
