government printing
Department:
Government Printing Works
REPUBLIC OF SOUTH AFRICA

HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works* (*GPW*).

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*'. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as **@gpw.gov.za**

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at **www.gpwonline.co.za**
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

DEPARTMENT OF WATER AFFAIRS

NO. 6392 **4 July 2025**

MZIMVUBU-TSITSIKAMMA WATER MANAGEMENT AREA (WMA 7) IN THE EASTERN CAPE PROVINCE: LIMITING THE USE OF WATER IN TERMS OF SECTION 6 OF SCHEDULE 3 OF THE NATIONAL WATER ACT OF 1998; FOR URBAN, AGRICULTURAL, AND INDUSTRIAL (INCLUDING MINING) PURPOSES

I, Dr Sean Philips, in my capacity as Director-General of the Department of Water and Sanitation (DWS), on reasonable grounds believe that a water shortage exists in the Kromme Sub-System of the Algoa Water Supply System (WSS) within the Mzimvubu-Tsitsikamma Water Management Area in the Eastern Cape Province; due to Impofu Dam level still being <50% on 01 November 2024 and it remain vulnerable, despite the good rains received in June and November 2024 coupled with flooding.

The Minister of Water and Sanitation may, in terms of item 6 (1) of Schedule 3 of the National Water Act of 1998 (Act 36 of 1998) (The Act) limit the use of water in the area concerned if the Minister, on reasonable grounds, believes that a water shortage exists within the area concerned. This power has been delegated to me in terms of Section 63 (1) (b) of the Act.

Therefore, in my capacity as the Director-General of the Department of Water and Sanitation I hereby under delegated authority in terms of section 6 (1) of Schedule 3 read with section 72(1) of the Act, limit the taking of water in terms of section 21(a) by all users in the geographical areas and schemes listed and described below, as follows:

1. The Algoa Water Supply System, its associated primary catchments and its footprint area of supply, as indicated in Table 1 below:

Table 1: *Dams and sub-systems of the Algoa WSS with restricted allocations for 2024/25, (based on operation risk assessments and presented at the Algoa WSS Operating Forum meeting of 27 November 2024)*

Scheme / Dam	River catchment	Restricted Allocation Availability	Curtailment %
Churchill and Impofu Dams	Kromme River	29.26 million m³/for domestic use (NMBM & Kouga LM), 0.476 million m³/ for irrigation use.	23% 43%

a. Curtailment of 23% on all taking of water from Impofu and Churchill Dams for domestic and industrial water use, and 43% on all taking of water for agricultural use from Churchill and Impofu Dams and the relevant parts of the primary catchments upstream of the dams.

b. Other sub-schemes and groundwater use within the Algoa WSS and the relevant parts of the primary catchments within which the Algoa WSS occurs, do not require restriction,

c. The taking of water from individual sub-systems and dams in the Algoa WSS be limited to the reduced allocations as specified in Table 1.

d. The DWS Eastern Cape Provincial Head is delegated the power to review the water restrictions, should the Kromme Sub-system in the Algoa WSS recover adequately or deteriorate further, during the current water year: 01 November 2024 to 31 October 2025, as informed by systems models and amend the water restrictions, otherwise the operating rules/restrictions stand until the next year's analysis and decisions.

This gazette is also available free online at **www.gpwonline.co.za**

2. The curtailments in Table 1 above are measured against the lawful water allocations / water registrations or water demand of the users as per projected annual water use.

3. The limitation applies to the annual water year commencing 01 November 2024 (for scheme members and those consulted).

4. All water user sector groups and individuals taking water from any water resource (surface or groundwater) regardless of their authorisation type, in the geographical areas listed and described above in the Mzimvubu to Tsitsikamma Water Management Area, shall install electronic water monitoring or measuring and recording devices to enable monitoring of abstractions, storage and use of water by existing lawful users.

5. All water use sectors groups and individuals taking water from any water resource (surface or groundwater) regardless of their authorisation type, in the geographical areas listed and described above in the Mzimvubu to Tsitsikamma Water Management Area must
   a. take records of water abstracted on a daily basis.
   b. establish links with any monitoring or management system designated by the responsible authority.
   c. submit monthly totals of metered volumes abstracted with effect from 30 days following the date of publication of this notice, in a format specified by the Department and shall continue such recording and reporting data monthly to the Department by the 5th day of each month to *metering.mzitsi@dws.gov.za*

All the affected Water Service Authorities (WSA) must ensure that all domestic water users, at least, have access to basic water service and that potable water supply to all domestic water users is not completely restricted.

In exercising these powers I have given preference to, the maintenance of the Reserve, treated all water users on a basis that is fair and reasonable, considered the actual extent of the water shortage, the likely effects of the shortage on the water users, the strategic importance of any water use and any water rationing or water use limitations by a Water Services Institution having jurisdiction in the area concerned, under the Water Services Act 108 of 1997.

Placing limitation on the taking of water as set out in this notice is an administrative action, affecting the rights of the public as contemplated in section 4 of the Promotion of Administrative Justice Act 3 of 2000 (PAJA). After I have taken into consideration all relevant factors, including those referred to in section 4 (4) (b), I have decided that it is reasonable and justifiable in the circumstances to depart from the requirements referred to in section 4 (1)(a) to (e), (2) and (3) and instituted this limitation without allowing the water users affected and other role players to comment on the matter before I institute the limitation.

This Notice overrides any other previous authorization on water use issued by the Department relating to water users from systems, schemes, dams and catchments specified in this Notice.

TRANSFORMATION AND AMALGAMATION OF THE KLERKSDORP, RIETPOORT, VYFHOEK AND KLIPDRIFT IRRIGATION BOARDS INTO MOOIRIVER AND SCHOONSPRUIT WATER USER ASSOCIATION IN TERMS OF SECTION 98 (6) OF THE NATIONAL WATER ACT, 1998 (ACT NO. 36 OF 1998)

I, Pemmy Majodina, the Minister of Water and Sanitation, hereby declare in terms of section 98(6) of the National Water Act, 1998 (Act No. 36 of 1998) that –

(a) The Mooi River and Schoospruit Water User Association is established.

(b) The Association's name is the Mooi River and Schoospruit Water User Association.

(c) The operational area of the Mooi River Schoonspruit Water User Association (hereinafter indicated as MSWUA), includes the water users abstracting water from the common sources in the Mooi River (C23) and Schoonspruit (C24) catchments from source or through common infrastructure such as canals and dams as well as the dolomite area in the northern part of the Mooi River (C23) and Schoonspruit (C24) catchments.

(d) The Northwest dolomite area was identified as the major source of water for the Schoonspruit and Mooi River catchments. Despite chambers within the dolomite area, the total dolomite area is permeable and therefore influences the different chambers and therefore overuse in one area would have a direct impact on the total dolomite area and within these two catchments. Based on the current situation regarding overuse and a steady decline in available water from the dolomite area to these catchments, the proper management of the total dolomite area is of critical importance to ensure the sustained and continued water supply to these catchments

(e) The proposed area has been rationalised to include all water users which abstract water from common sources and canals but also including the dolomite area north of Ventersdorp in the Mooi River (C23) and Schoonspruit (C24) catchments.

(f) All the current government water schemes and current irrigation boards within the Mooi River (C23) and Schoonspruit (C24), will fall into the proposed WUA operational area.

(g) Delegation of powers and functions of the Water User Association is per the delegations of 31 March 2023, which will be provided to the Water User Association.

(h) The constitution of the Mooi and Schoonspruit River Water User Association has been approved.

- Records & Returns; and
- Levies:
    - Research, development and information levy (RDI levy);

    - Brandy generic promotion levy (Brandy levy).

SA Wine contracted the following business units / non-profit companies (NPCs) to conduct its operational or business services, namely -

  To ensure that continuous, timeous and accurate information is available to all role players. Market information is deemed essential for all role players for them to make informed decisions. By combining compulsory registration with the keeping of information and the rendering of returns on an individual basis, market information for the whole of the industry can be processed and disseminated and will form the basis for the collection of statutory levies. SAWIS will be responsible for the above-mentioned statutory measures.

- Payment of the s**tatutory levy amount** for the funding of the following functions in the wine and brandy industry, namely**:**

  - Research, Development and Information Levy (RDI levy)

  To co-ordinate and fund research and development, innovation, training, technology and knowledge transfer, business intelligence, media and communication, tourism and advocacy, stakeholder engagement, conducive policies that ensure license to trade and market access in the wine industry.

  According to South Africa Wine, the industry can only prosper over the long term if it remains competitive, is inclusive, has a conducive regulatory environment that include access to relevant research, continue to invest in skills and can create more opportunities via market access. The RDI levy will be invested within a clear strategy governed with oversight by the South Africa Wine Board. Specific focus areas that will be managed with a programme approach includes: research and innovation, information and business intelligence, policy, stakeholder management and market access, media and communication and wine tourism.

- Wine Export Generic Promotion Levy (Export levy)

To generically promote SA wines on selected export markets and to improve the efficiency of the export process.

According to SA Wine, the export levy will assist the SA wine industry to remain competitive in the global marketplace. In addition, it will assist in capacity building among all exporters, in particular SMME's and BEE's, and in improving the efficiency of the export process. A portion of the levy is also be used to fund, maintain and further develop the Wine-on-Line system, a free, user friendly, automated export certification process.

- Brandy Generic Promotion Levy (Brandy levy)

The objective of the brandy levy is to contribute to creating a transformed and responsible value chain and focus market for brandy. An integrated approach in collaboration with the wine industry will have a larger impact on the entire value chain. This is important to empower new entrants into the category and offer support/mentorship to ensure successful launches.

The proposed brandy levy is to be used to grow the entire brandy industry and to position South African brandy as a credibly quality alternative to Cognac, locally and globally.

The following levy amounts are proposed:

Grapes intended for the production of wine	**2026**	**2027**	**2028**	**2029**

* cents per litre at 17.4°Baling
** cents per litre at 10% alcohol per volume

SA Wine is the responsible entity for the implementation and administration of the statutory measures in the industry.
A product is levied once only per levy. Thus, for example, if grapes intended for the production of wine were levied for the research, development and information levy, it cannot be levied in another format (such as wine) again for the research, development and information levy.

SA Wine will continue to spend at least 20% of the total amount of levies collected towards transformation projects.

The NAMC believes that the application by SA Wine for the continuation of the wine and brandy statutory measures is consistent with the objectives of the MAP Act (as set out in section 2 of the Act).

Directly affected groups (e.g. wine producers, wine traders, wine spirit producer, and exporters of drinking wine) in the wine and brandy industry are kindly requested to submit any comments, in writing, regarding the proposed statutory measures, to Mathilda van der Walt (mathildavdw@namc.co.za) on or before 18 July 2025, to enable the NAMC to finalise its recommendation to the Minister in this regard.
