HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works* (*GPW*).

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*'. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as **@gpw.gov.za**

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at **www.gpwonline.co.za**
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

SCHEDULE

Agrément Certificate 2022/634 (Amended June 2024)

Subject: Amalooloo/MyLoo Urine Diversion and Low Volume Multi-Flush Toilet System

Certificate holder: Betram (Pty) Ltd

Description: The Amalooloo/MyLoo Urine Diversion and Low Volume Multi-Flush Toilet System is a combination of low-flush and non-water-borne toilets that comprise prefabricated construction panels and plumbing components.

The system consists of the following components:

- **A pedestal with a complete Urine Diversion System (UDS) and child safety seat.**

This pedestal system includes a liquid separation function that allows liquid to be dispersed through a dispersion field and for solid waste to be collected and dried in a pit.

- **Myloo Pedestal with a visual barrier at the bottom of the toilet pan**.

This pedestal is the same as the urine diversion but includes a visual barrier between the user and the pit. The barrier comprises a mechanical flap that remains in the closed position while the toilet is not in use. When a user sits on the toilet the flap opens allowing a free channel for defecation to pass through to the pit. The flap can also be opened by stepping on a foot pedal.

- **A Low Volume Multi-Flush Sanitation System.**

The low volume multi flush system allows for the system to be installed as either a pour flush system without the need for the Amalooloo cistern component to be fitted, or a lever flush system fitted with the incorporated Amalooloo cistern component. The low volume multi flush system allows for effective flushing performance with a flush volume of 1.0 litres or more. The pedestal is replaced by a toilet pan arrangement with a uniquely designed discharge configuration. The configuration comprises a uniform pipe length containing no water trap. To limit smells from the toilet pan, a self-closing flap is provided at the outlet of the pipe and a 110 mm vent stack pipe is provided for airflow

from the toilet pan side to the outlet of the air stack. The function of the vent is to eliminate and/or significantly reduce smells.

- **Top structure and Bottom Structure**

The system is manufactured from reinforced precast concrete slabs consisting of the following components:

- top structure with a base, roof, side panels and a door; and
- a sealed bottom structure.

The dimensions of the panels are described as follows:

- side wall panels – 1150 mm length x 990 mm height x 30 mm thickness (2 identical panels each side)
- back wall panels – 970 mm length x 990 mm height x 30 mm thickness (2 identical panels)
- roof slab – 1250 mm length x 970 mm width x 40 mm thickness
- floor slabs - 1250 mm length x 970 mm width x 40 mm thickness and
- bottom structure – 2500 mm length x 1250 mm width x 1000 mm depth.

Optional components of the system can include:

- Rainwater collection gutters fitted to the roof slabs
- Freestanding rainwater collection tank
- External hand wash basin with a tap, fed from the rainwater collection tank and
- A concrete tank stand.

Agrément Certificate 2018/588

Subject: Roadsaver Coldlay Surfacing System

Certificate holder: Universal Blending (Pty) Ltd

Description: Roadsaver Coldlay Surfacing System (Roadsaver mix) is an asphalt mix produced from the coarse aggregate, crusher run and modified bitumen (Bitubind) for road repairs and maintenance.

The Roadsaver mix design is batched per the desired mass in the following ratios:

- Bitubind 6%
- 7.1 m aggregate 65%
- Unwashed crusher-run 29%

The Roadsaver mix is manufactured at a factory and packaged in 25 kg sealed plastic bags or 350 litre drums.

The Roadsaver mix is applied to concrete and asphalt roads. For proper application, the road section is cut to size and cleared of debris before application

of the product. For repairs above 1 m2, the section is treated with a tack coat (SS60 Anionic Bitumen Emulsion) before application of the Roadsaver mix.
The product is applied to the treated road section with an overlap of 10 mm above the road surface and compacted after application or in layers of 20 mm to 40 mm for large square areas. The road is open for traffic immediately after compaction.
Roadsaver mix complies with Class 4-Type 3 as described in the Agrément South Africa's guidelines.

SCHEDULE

Agrément Certificate 2025/653

Subject: Shocrete Mark 2 (MK 2) Precast Concrete Toilet Top Structure

Certificate holder: Shocrete (Pty) Ltd

Description:

The Mark 2 Precast Concrete Toilet Top Structure is as follows:

- Wall and roof panels are of a waffle slab design, resulting in lightweight panels.
- MK 2 uses nylon bushes cast into the slabs, which are bolted together with galvanised M8 bolts.
- The floor slab size has been modified with three optional configurations, depending on whether the Shocrete pit lining is used or if contractors line the pits. If the Shocrete pit lining is used, the base slab can be made up of two sections – the main slab supporting the top structure, and a separate removable filler slab accommodating only the vent pipe. The two-component option has the advantage of easier handling and placing on-site, as well as the option to empty the pit when the pit is full.
- A galvanised Iron door manufactured by Shocrete (Pty) Ltd with a door latch.
- The Y8 and Y6 reinforcing bars are used to provide simpler casting as well as improved strength.

Component 1: Base slab.

- The components of the base slab for the Mark 2 toilet are thus:
- A 1250 mm x 1010 mm slab with a 200 mm hole for mounting of a standard 200mm VIP pedestal or a standard 200 mm UD pedestal; with a filler slab 1000 mm x 700 mm with a 110 mm tapered hole for the vent pipe.

Gazette Notice Publication Request Form

- A 1500 mm x 1000 mm slab with two 200 mm holes and 2 tapered 110 mm holes for use with double pit VIPs, together with two 1500 mm x 490 mm filler slabs.
- A 1500 mm x 1000 mm slab with a 200 mm hole for mounting a standard VIP or UD pedestal and a 110 mm tapered hole for the vent pipe. An additional filler slab of 1000 mm x 700 mm is optional for larger pits and where pit emptying is envisaged.

Component 2: Roof slab.

- The roof slab is made of a waffle-type casting to reduce the weight, and the dimensions are 1210 mm x 990 mm and 40 mm thick. The reinforcing is Y8 bars.

Component 3: Side wall panels.

- The side walls consist of 3 identical panels on each side, each with a waffle-type casting to reduce weight. They measure 1140 mm x 635 mm and 40 mm thick, and the reinforcing material is Y6 bars.
- The centre panel is fitted with a striker plate for the door latch.
- Angle iron for bolting panels together (50 mm x 50 mm galvanised)
- Foam tape is inserted between wall panels (8 mm thick, but other specifications are not given).

Component 4: Back wall panels.

- The back walls consist of two (2) identical panels with a waffle-type casting to reduce weight. The dimensions are 995 mm x 945 mm and 40 mm thick. The reinforcing is Y8 bars. The top panel has a 110 mm ventilation hole in the centre, while the bottom panel has an optional knock-out hole template for situations where the pedestal is a waterborne system.

Component 5: Galvanised door

- Shocrete (Pty) Ltd manufactures its own galvanised steel door. The dimensions for the doors are 1800 mm x 850 mm. Two types of ribbing are used, the first where the ribs are bent on site, and the second where the ribs are pre-done by the suppliers. The basic elements of the door (0.5mm full hard galvanised steel) are supplied to Shocrete (Pty) Ltd from an external supplier. The doors are then assembled at the Shocrete (Pty)

Ltd.'s premises. Assembly entails attaching the strengthening channels, hinges and latches to the basic galvanised door. The doors are made rigid by bending 3 V-ridges into the door, folding the sides into a channel, and attaching 3 horizontal lip channels across the doors. The door is fitted with the unique Envirosan cc closing and locking latch.

A number of clients have accepted the design, and Shocrete (Pty) Ltd has continued to manufacture it according to this design to supply those clients and offer an alternative to new clients. The Shocrete Mark 3 Precast Concrete Toilet Top Structure differs from the Mark 2 structures as follows:

• Wall panels are of a smooth slab design.

• The roof panel has a waffle slab design but with a different pattern from Mark 2.

• The floor slab options are the same as for the Mark 2 configuration.

• There are 3 panels used for the back wall as opposed to the two panels for the Mark 2.

Component 1: Base slab.

- A 1500 mm x 1000 mm slab with a 200 mm hole for mounting a standard VIP or UD pedestal and a 110 mm tapered hole for the vent pipe. An additional filler slab of 1000 mm x 700 mm is optional for larger pits and where pit emptying is envisaged.

Component 2: Roof slab.

- The roof slab is made of a waffle-type casting, with 1146 mm x 930 mm and 40 mm thick dimensions. These dimensions are slightly smaller than the Mark 2 Roof slab. The reinforcing is Y8 bars.

Component 3: side wall panels.

- The side walls consist of 3 identical panels on each side with a smooth wall casting. They measure 1150 mm x 635 mm and 40 mm thick. The

Subject: Spunbond Roof Undertile Membrane

Certificate holder: RF Spunbond (Pty) Ltd.

Description: Spunbond Roof Undertile Membrane is an 80 g/m^2 nonwoven fabric created by extruding molten thermoplastic (polypropylene) material into continuous filaments. These filaments are laid down to form a web and then bonded together.

The Spunbond Roof Undertile Membrane is designed to prevent excessive pressure build-up within the roofing cavity during wind gusts. It is specifically intended for use as an under-tile roofing membrane in all tiled roof residential building applications in both conventional and Agrément-approved roof constructions, across all regions of South Africa, catering to all occupancy classification types (SANS 10400: Table 1 of Regulations A (20) (1)). When utilised in the conventional manner, it is capable of:

- reduce air leakage, and
- reduce ingress to the roof space from wind-driven rain and dust.

This certificate and Agrément South Africa's assessment apply only to the Spunbond Roof Undertile Membrane manufactured by RF Spunbond (Pty) Ltd. It is installed in accordance with the certificate holder's installation manual, as described and illustrated in this certificate, and where the terms and conditions of certification are complied with.

APPLICATION FOR THE CONTINUATION OF STATUTORY MEASURES
(REGISTRATION, RECORDS AND RETURNS AND A LEVY ON COTTON LINT)
IN TERMS OF THE MARKETING OF AGRICULTURAL PRODUCTS ACT, 1996, (ACT NO 47 OF 1996),
(MAP ACT) AS AMENDED

••••

INVITATION TO DIRECTLY AFFECTED GROUPS IN THE COTTON INDUSTRY TO FORWARD COMMENTS REGARDING THE REQUEST FROM COTTON SOUTH AFRICA

In terms of section 11 of the Marketing of Agricultural Products Act, 1996 (Act No. 47 of 1996) (MAP Act), the NAMC hereby announce that the Minister of Agriculture has received a request from Cotton South Africa (NPC), on behalf of the directly affected groups in the cotton industry, for the continuation of the following statutory measures for a new period of four years as from 1 April 2026:

- Registration with Cotton South Africa of producers, purchasers, processors, importers and exporters of cotton (in terms of section 19 of the MAP Act);
- the keeping of records and the submission of returns to Cotton South Africa by exporters, importers, processors and purchasers of cotton (in terms of section 18 of the MAP Act); and
- a statutory levy on cotton lint at a rate of **31 c/kg** (VAT excluded) from 1 April 2026, and thereafter (from 1 April 2027) with annual adjustments equal to the preceding year's consumer price index published by Stats SA and communicated by Cotton South Africa, to be payable by South African ginners on cotton lint produced.

The current statutory measures administered by Cotton South Africa, namely the statutory levy of **30 c/kg** (VAT excluded) on cotton lint produced, payable by ginners to Cotton South Africa, as well as the statutory measures relating to registration with Cotton South Africa of producers, purchasers, processors, importers and exporters of cotton and the keeping of records and the submission of returns to Cotton South Africa by exporters, importers, processors and purchasers of cotton, will lapse on 31 March 2026.

The affected role players as represented on the Board of Cotton South Africa*, i.e.* from farm to retail including labour, all supported the continuation of the statutory measures. Letters of support were received from:

- the South African Cotton Producers' Organisation which is the representative body for all South African cotton farmers.
- the South African Cotton Ginners' Association who represents the cotton ginners.
- the present three cotton spinners.
- the National Clothing Retail Federation of South Africa.
- the South African National Consumer Union and
- the South African Textile Workers Union.

The purpose and aims of the continuation of statutory measures are to enable Cotton South Africa to perform the following functions, which would be partly funded from the levy income:

a) The collection, processing and dissemination of reliable production and market information;
b) promotion of cotton production and usage;
c) coordination and funding of production, product and market research;
d) maintenance of quality standards and norms and provision of training in this regard;
e) facilitation of the development of the emerging cotton production sector; and
f) to act as the representative industry forum.

According to the applicant, the budgeted income from the proposed statutory levies is estimated to be between R3.9 million and R4.3 million per annum on local production of cotton lint for the proposed levy period of 1 April 2026 – 31 March 2030. These forecasts are based on the assumption that a steady increase in the cotton crop is expected for the next few years and an inflation rate of approximately 5% per year. Other income for Cotton South Africa includes amongst others, contributions for small-scale farmer training, income from the provision of grading services to outside parties, cotton mark royalties, investment income, rental income and voluntary contributions by importers of cotton lint outside SADC.

As the proposed continuation of statutory measures is consistent with the objectives of the MAP Act, the NAMC is investigating the possible implementation of the proposed statutory measures.

Directly affected groups in the cotton industry are kindly requested to submit comments or objections regarding the proposed continuation of statutory measures to the NAMC in writing (e-mail lizettem@namc.co.za) on or before 22 August 2025, to enable the Council to formulate its recommendation to the Minister in this regard.
