HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works* (*GPW*).

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*'. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as **@gpw.gov.za**

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at **www.gpwonline.co.za**
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

PART III

SAMPLING

Obtaining sample

9. (1) A representative sample of a consignment of canola shall --

(a) in the case of canola delivered in bags and subject to regulation 10, be obtained by sampling at least ten (10) per cent of the bags, chosen from that consignment at random, with a bag probe: Provided that at least 25 bags in a consignment shall be sampled and where a consignment consists of less than 25 bags, all the bags in that consignment shall be sampled; and

(b) in the case of canola delivered in bulk and subject to regulation 10, be obtained by sampling that consignment throughout the whole depth of the layer, in at least six different places, chosen at random in that bulk quantity, with a bulk sampling apparatus.

(2) The sample obtained in sub regulation (1)(a) or (b) shall --

(a) have a total mass of at least 3kg; and

(b) be thoroughly mixed before further dividing.

(3) If it is suspected that the sample referred to in sub regulation (1)(a) is not representative of that consignment, an additional five per cent of the remaining bags, chosen from that consignment at random, shall be emptied into a suitable bulk container and sampled in the manner contemplated in sub regulation (1)(b).

(4) If it is suspected that the sample referred to in subregulation (1)(b) is not representative of that consignment, an additional representative sample shall be obtained by using an alternative sampling pattern, apparatus, or method.

(5) A sample taken in terms of these regulations shall be deemed to be representative of the consignment from which it was taken.

Sampling if contents differ

10. (1) If, after an examination of the canola taken from different bags in a consignment in terms of regulation 9(1), it appears that the contents of those bags differ substantially --

(a) the bags concerned shall be separated from each other;

(b) all the bags in the consignment concerned shall be sampled in order to do such separation; and

(c) each group of bags with a similar content in that consignment shall for the purposes of these regulations be deemed to be a separate consignment.

(2) If, after the discharge of a consignment of canola in bulk has commenced, it is suspected that the consignment could be of a class or grade other than that determined by means of the initial sampling, the discharge shall immediately be stopped and the part of the consignment remaining in the bulk container, as well as the canola that is already in the collecting tray, shall be sampled anew with a bulk sampling apparatus or by catching at least 20 samples at regular intervals throughout the whole off loading period with a suitable container from the stream of canola that is flowing in bulk.

Working sample

11. A working sample of canola shall be obtained by dividing the representative sample of the consignment according to the method as prescribed by the ICC 101/1 (Approved 1982) method.

PART IV

INSPECTION METHODS

Determination of undesired odour, harmful substances, poisonous seeds, glass, metal, coal, dung, snails and insect content

12. A consignment shall be assessed sensorially or a sample of a consignment shall be assessed sensorially or analysed to determine --

(a) whether it has a musty, sour, khaki bush or other undesired odour;

(b) whether it contains canola in or on which a substance occurs that renders it unsuitable for human or animal consumption or processing into or utilization thereof as food or feed;

(c) whether it contains poisonous seeds;

(d) whether it contains glass, metal, coal or dung;

(e) whether it contains any insects;

(f) whether it contains any snails.

Determination of moisture content

13. The moisture content of a consignment of canola may be determined according to any suitable method: Provided that the results thus obtained are in accordance with the maximum permissible deviation for a class 1 moisture meter as detailed in ISO 7700/2 based on results obtained by means of the 72-hour 103°C oven dried method (AACC Method 44-15A).

Determination of percentage heat damaged seed and distinctly green seed

14. The percentage heat-damaged seed and distinctly green seed in a consignment canola shall be determined as follows:

(a) Use a 100-seed ruler in which canola seed can fit.

(b) Place the ruler in the clean sample and ensure that 100 seeds are placed in holes.

(c) Place masking tape over seeds and apply pressure to ensure that seeds attach to the masking tape.

(d) Remove masking tape and place on a flat surface with seeds facing upwards.

(e) With a roller, crush the canola, and count the number of heat-damaged seed and distinctly green seeds separately.

(f) Repeat the procedure from (a) to (e) three times. The procedure is repeated an additional seven times to obtain test results on 1000 seeds if any heat-damaged seeds are present in the first three x100 tests.

(g) Determine the average number of heat-damaged seed and distinctly green seeds respectively.

(h) Express the numbers thus determined separately as a percentage of 100 seeds.

(i) Such percentages represent the percentage heat-damaged seed and distinctly green seeds respectively in the consignment concerned.

Determination of percentage foreign matter

15. The percentage foreign matter in a consignment of canola shall be determined as follows:

(a) Obtain a working sample of at least 500g from a representative sample of the consignment.

(b) Place the sample on the round-hole sieve that fits on top of the slotted sieve and sieve the sample by moving the sieve 10 strokes back and forth, alternately away from and back towards the handler of the sieve. With each stroke, move the sieve which rests on a table or other smooth surface, 250mm to 460mm away from and back toward the handler. The prescribed 10 strokes must be completed within 10 to 15 seconds.

(c) Weigh the material remaining on the round-hole sieve and express it as a percentage.

(d) inspect the sample under the round-hole sieve for any sand, weed seeds, or any other material other than whole and broken canola seeds/hulls. If any of the above items are observed in the sample under the round-hole sieve, the slotted `sieve is used for further grading as described in (e) otherwise, proceed directly to point (g).

(e) if sand, weed seeds, or any other material besides whole and broken canola seeds/hulls are found in the sample under the round-hole sieve, the remaining portion of the sample is sieved using the slotted sieve by moving the sieve 40 stokes back and forth, alternatively away from and back toward the handler of the sieve. With each stroke, move the sieve, which rests on a table or other smooth surface, 250mm to 460mm away from and back toward the handler. The prescribed 40 strokes must be completed within 40 to 50 seconds.

(f) Determine the mass of all the material that passes through the slotted sieve and express the mass as a percentage of the working sample.

(g) The total foreign material is calculated by adding the percentages determined in (c) and (f).

Determination of percentage sclerotinia

16. The percentage sclerotinia in a consignment of canola shall be determined as follows:

(a) Obtain a working sample of at least 100g from a representative sample of the consignment.

(b) Remove all sclerotinia by hand from the working sample and determine the mass thereof.

(c) Express the mass thus determined as a percentage of the working sample.

(d) Such a percentage represents the percentage of sclerotinia in the consignment concerned.

Determination of percentage sprouted seed

17. The percentage of sprouted seed in a consignment of canola shall be determined as follows:

(a) Use a 100-seed ruler in which canola seed can fit.

(b) Place the ruler in the clean sample and ensure that 100 seeds are placed in the holes.

(c) Place masking tape over seeds and apply pressure to ensure that seeds attach to the masking tape.

(d) Remove masking tape and place on a flat surface with seeds facing upwards.

(e) Count the number of sprouted seeds.

(f) Repeat the procedure from (a) to (e) at least three times.

(g) Determine the average number of sprouted seeds respectively.

(h) Express the numbers thus determined as a percentage of 100 seeds.

(i) Such a percentage represents the percentage of sprouted seeds in the consignment concerned.

Determination of percentage ergot sclerotia

18. The percentage of ergot sclerotia in a consignment of canola shall be determined as follows:

(a) Obtain a working sample of at least 100g from a representative sample of the consignment.

(b) Remove all ergot sclerotia by hand from the working sample and determine the mass thereof.

(c) Express the mass thus determined as a percentage of the working sample.

(d) Such a percentage represents the percentage of ergot sclerotia in the consignment concerned.

PART V

Offences and penalties

19. Any person who contravenes or fails to comply with any provision of these regulations shall be guilty of an offence and upon conviction be liable to a fine or imprisonment in terms of section 11 of the Act.

Commencement date

20. The regulations shall come into operation six months after the date of publication.

Repeal

21. Regulations published by Government Gazette No. R. 622 of 5 June 2009 are hereby repealed from the date of commencement of these regulations
